

Features

- · Constant Current mode output with multiple levels selectable by dip switch
- Emergency lighting application is available according to IEC61347-2-13
- · Built-in active PFC function and class II design
- Standby power consumption < 0.5W
- · Functions: DALI interface(logarithm or linear dimming curve selectable), push dimming synchronization up to 10 units
- · 3 years warranty

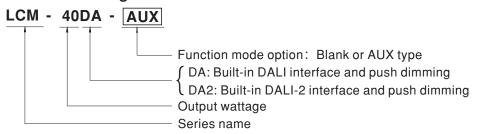

Applications

- · LED indoor lighting
- · LED office lighting
- · LED commercial lighting
- · LED panel lighting
- Industrial lighting

Description

LCM-40DA series is a 40W AC/DC constant current mode output LED driver featuring the multiple levels selectable by dip switch and the DALI interface with the compliance to IEC62386. LCM-40DA operates from 180~295VAC and offers different current levels ranging between 350mA and 1050mA. Thanks to the high efficiency up to 91%, with the fanless design, the entire series is able to operate for -30 $^\circ$ C ~+90 $^\circ$ C case temperature under free air convection. In addition, LCM-40DA is equipped with push dimming and synchronization functions, so as to provide the optimal design flexibility for LED lighting system.

Model Encoding

Type	Function	Note
Blank	standby power consumption <0.5W	In Stock
AUX	standby power consumption <1.2W and Auxiliary DC output(12V/50mA)	By request

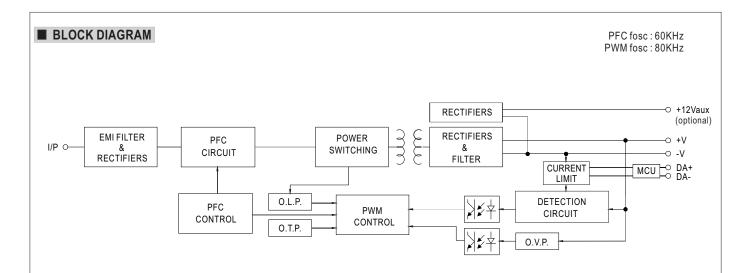

SPECIFICATION

MODEL		LCM-40							
		Current level select	table via DIP switch	n. please refer to"D	IP SWITCH TABLE" section				
	CURRENT LEVEL	350mA	500mA	600mA	700mA(default)	900mA	1050mA

■ DIP SWITCH TABLE

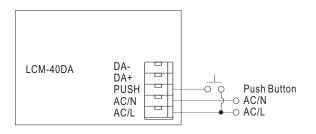

LCM-40DA/DA2 is a multiple-stage constant current driver, selection of output current through DIP switch is exhibited below.

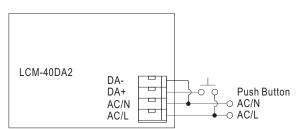

lo DIP S.W.	1	2	3	4	5	6
350mA						
500mA	ON					
600mA	ON	ON				
700mA(factory default)	ON	ON	ON			ON
900mA	ON	ON	ON	ON		ON
1050mA	ON	ON	ON	ON	ON	ON

Note: For more current setting, please contact MW's sales.

■ DIMMING OPERATION

※PUSH dimming(primary side)

Action	Action duration	Function
Short push	0.1~1 sec.	Turn ON-OFF the driver
Long push	1.5~10 sec.	Every Long Push changes the dimming direction, dimming up or down
Reset	>11 sec.	Set up the dimming level to 100%

- The factory default dimming level is at 100%.
- If the push action lasts less than 0.05 sec., it will not lead to a change for the status of the driver.
- Up to 10 drivers can perform the PUSH dimming at the same time when utilizing one common push button.
- The maximum length of the cable from the push button to the last driver is 20 meters.
- The additive push button can be connected only between the PUSH terminal, as displayed in the diagram, and AC/L (in brown or black); it will lead to short circuit if it is connected to AC/N.

★DALI interface(primary side; for DA/DA2-Type)

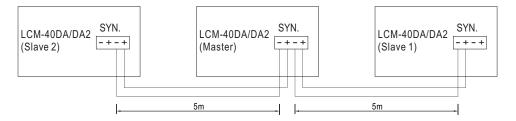

- · Apply DALI signal between DA+ and DA-
- · DALI protocol comprises 16 groups and 64 addresses.
- · First step is fixed at 6% of output.

■ SYNCHRONIZATION OPERATION

- Synchronization up to 10 drivers (1 master + 9 slaves)
- Dimming operating range : 10%~100%
- Sync cable length : < 5m • Sync cable type : Flat cable
- Sync cable cross section area: 22 24 AWG (0.2~0.3mm²)

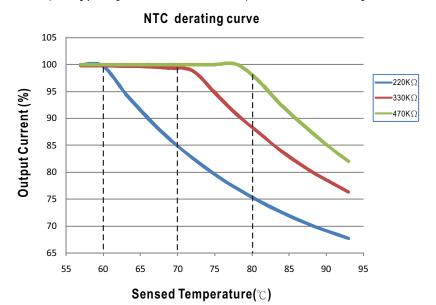

NOTE: 1. Please make sure all units are set to 100% dimming setting (factory default) before synchronizing.

2. Min. Dimming operating range depends on dimmer setting.

■ TEMPERATURE COMPENSATION OPERATION

LCM-40DA/DA2 have the built-in temperature compensation function; by connecting a temperature sensor (NTC resistor) between the +NTC / -NTC $terminal\ of\ LCM-40DA/DA2\ and\ the\ detecting\ point\ on\ the\ lighting\ system\ or\ the\ surrounding\ environment,\ output\ current\ of\ LCM-40DA/DA2\ could\ be$ correspondingly changed, based on the sensed temperature, to ensure the long life of LED.

© LCM-40DA/DA2 can still be operated normally when the NTC resistor is not connected and the value of output current will be the current level selected through the DIP switch.

NTC reference:

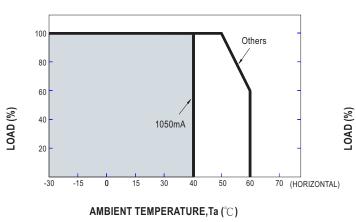

NTC resistance	Output Current
220K	< 60 $^{\circ}$ C, 100% of the rated current (corresponds to the setting current level) > 60 $^{\circ}$ C, output current begins to reduce, please refer to the curve for details.
330K	< 70°C , 100% of the rated current (corresponds to the setting current level) > 70°C , output current begins to reduce, please refer to the curve for details.
470K	< 80° C, 100% of the rated current (corresponds to the setting current level) > 80° C, output current begins to reduce, please refer to the curve for details.

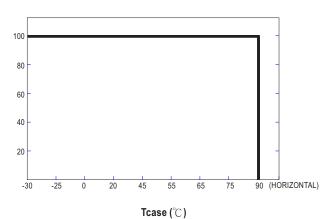

Notes: 1. MEAN WELL does not offer the NTC resistor and all the data above are measured by using THINKING TTC03 series.

- 2. If other brands of NTC resistor is applied, please check the temperature curve first.
- O Dimming and synchronization function of the driver will be invalid when the "temperature compensation" function is in use.
