

#### Features

- 4"×2" compact size
- Medical safety approved (2 x MOPP) accroding to ANSI/AAMI ES60601-1 and IEC/EN60601-1
- Suitable for BF application with appropriate system consideration
- · Cooling by free air convection
- EMI class B for class I configuration
- Extremely low leakage current
- Protections: Short circuit / Overload / Over voltage
- · 3 years warranty

## Applications

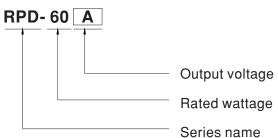

- · Oral irrigator
- · Hemodialysis machine
- Medical computer monitors
- Sleep apnea devices

# Description

RPD-60 is a 60W highly reliable green PCB type medical power supply with a high power density on the 4" by 2" footprint. It accepts 90~264VAC input and offers dual output voltages.

RPD-60 is able to be used for Class I (with FG) system design. The extremely low leakage current is less than 150 $\mu$ A. In addition, it conforms to international medical regulations (2\*MOPP) and EMC EN55011.

- 2. 33% Duty cycle maximum within every 30 seconds. Average output power should not exceed the rated power.

  3. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1 \( \mu \) f \( \text{p} \) arallel capacitor.
- 4. Tolerance : includes set up tolerance, line regulation and load regulation.

NOTE

- 5. Touch current was measured from primary input to DC output.
  6. The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500ft).
  7. Length of set up time is measured at cold first start. Turning ON/OFF the power supply may lead to increase of the set up time.
- 8. Heat Sink HS1, HS2 can not be shorted.
- 9. The power supply is considered a component which will be installed into a final equipment. All the EMC tests are been executed by mounting the unit on a 360mm\*360mm metal plate with 1mm of thickness. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies."
