The TDR-3 series is a family of compact 3 W dc/dc-converters with 2:1 input voltage ranges and tightly regulated output voltages even under no load conditions. The product is available in SMD-package or in DIP-package. They work with high efficiency over the full load range and come with a remote On/Off input. The usability in temperature ranges of up to  $85^{\circ}\text{C}$ , continuous short circuit protection and excellent immunity against environmental influences make these converters very reliable.

A TDR-3 converter is the ideal solution for space critical high end applications in communication equipment, instrumentation and industrial electronics.
